Field Trial: Evaluation and Acceptance Form

On-site testing of G-one at a pharmacy or medical retail establishment, by its staff, its pharmacist and its customers

This form records an on-site trial of **G-one**, a wrist strap and Android app that watches movement and vital signs, explains them in plain language, and texts an emergency contact after a fall. Fill in **what was actually done and seen**. Where a capability was not tried, tick *Not tested* or leave the row blank. The **developer's reference** column on page 2 gives the G-one team's own laboratory results on public datasets, for comparison only; it is not a result of this trial.

A ESTABLISHMENT DETAILS

Name of establishment: Example Pharmacy (fictional, for testing this form)

Type: ☑ Pharmacy / chemist ☐ Medical store ☐ Surgical & medical equipment retailer ☐ Other:

Drug licence / registration no.: EXAMPLE-DL-0000 GSTIN (optional):

Address: Shop 0, Example Market

City / town: Example City District: Example District State: Example State PIN: 000000

Contact person: A. Example Designation: Proprietor

Phone: 00000 00000 Email: example@example.com

Pharmacist-in-charge: B. Example Pharmacy Council registration no.: EXAMPLE-0000

B TRIAL DETAILS

Trial date: from 01-01-2026 to 01-01-2026 Start time 10:00 End time 14:00

G-one app version: 1.0 (build 1) Phone model(s) used: Samsung Galaxy S24 FE (SM-S721B)

Strap ID / serial no.: STRAP-00 Strap firmware version: example

G-one evaluator(s) present: Example evaluator, G-one

Where on the premises: Shop counter and shop front Total hours of testing: 4

C WHO TOOK PART

Group	Number of people	How they took part (e.g. wore the strap, ran the app, watched a demonstration)
Establishment staff	2	Wore the strap, ran the app
Pharmacist(s)	1	Reviewed alerts and the assistant's explanations
Customers / walk-in volunteers	6	Wore the strap for a few minutes; watched a staged fall
Others (state)		

☑ Every participant was told what the trial is and agreed before taking part.

☑ Customers' names and health readings were not kept after the trial, or kept only with their written consent.

☑ Emergencies were simulated (staged falls, demo mode); no real emergency contact was messaged without that person's agreement.

☑ No participant was given medical advice on the basis of G-one readings.

SAMPLE — NOT A REAL TRIAL

D CAPABILITIES TESTED

Reference figures: G-one lab results, not this trial

For each capability: tick **Tested** or **Not tested**, write how many times it was tried and how many times it behaved as described, and note anything seen. A staged fall means a safe, deliberate jolt or a replayed recording, never a real fall.

#	Capability	Developer's reference (lab, not this trial)	Tested	Not tested	Times tried	Times it worked	What was seen / remarks
1	**Live readings from the strap over Bluetooth (movement, skin temperature)**	Designed for 2 readings a second	☑	☐	5	5	Readings arrived
2	**Fall alert from the strap (impact above 5 g)**	Rule on lab recordings: 50.7% of falls caught; 89.6% of daily activities with no alarm	☑	☐	4	4	Staged jolts
3	**Fall model, replayed in the app's Model Lab**	96.2% of falls caught, 95.9% of daily activities with no alarm (people held out); 64.8% / 98.1% on a dataset it never saw	☑	☐	10	9	One daily activity flagged
4	**"I'm OK" cancel window before the SOS text**	20 s by default (10, 20 or 30 s in Settings)	☑	☐	4	4	Cancelled each time
5	**SOS text message to the emergency contact**	Sent after the window; never sent for a model-only or city-weather alert	☑	☐	2	2	Test contact only
6	**Heart rate in context model**	2.24 false alerts per 24 h vs 51.58 for a fixed rule (PAMAP2). Strap pulse sensor not yet active: shown with recorded data	☑	☐	2	2	Recorded data
7	**Sleep or awake model**	91.9% of 30-s periods right; Cohen's kappa 0.46 vs 0.37 for a movement threshold	☑	☐	1	1	Recorded night
8	**On-phone AI assistant (works offline)**	Rewords alerts in plain language; does not decide them	☑	☐	3	3	
9	**Official disaster alerts for the district (NDMA SACHET)**	District matched on the phone; no location is sent	☐	☑			
10	**City weather in the heat rules, and India AQI**	City-based warnings capped at moderate; never an SOS	☑	☐	1	1	
11	**Health report PDF and NFC emergency card**	-	☑	☐	1	1	
12	**Model speed on this phone (Model Lab)**	9-27 microseconds per run on the CPU of a Samsung SM-S721B	☑	☐	1	1	

E RATINGS BY GROUP

1 = poor, 3 = acceptable, 5 = excellent; leave blank if not asked

Statement	Staff (average)	Pharmacist	Customers (average)
Easy to put on and set up	4	4	4
Readings and alerts were easy to understand	4	4	4
Fall alert and the "I'm OK" cancel worked as shown	4	4	4
Assistant explanations were clear and in plain language	4	4	4
Comfortable to wear for the time tested	4	4	4
Would suggest it for customers who live alone or are elderly	4	4	4

SAMPLE - NOT A REAL TRIAL

F OBSERVATIONS

Problems, failures or false alarms seen (what happened, when, how often)

Example text: one Bluetooth reconnect after the phone screen locked.

Comments and suggestions from staff, the pharmacist and customers

Example text: larger text on the alert screen.

G OUTCOME OF THE TRIAL

- [x] G-one performed as described above and is acceptable for continued use or trial at this establishment.
- [ ] Acceptable, with the conditions or changes written below.
- [ ] Not acceptable at this stage (reasons below).

Conditions, changes needed or reasons

H DECLARATION AND SIGNATURES

We confirm that the trial described in this form took place at our premises on the dates stated, and that the results, ratings and remarks recorded here are what we and the participants observed. We understand that G-one is a research prototype: it is **not a certified medical device**, it does not diagnose or treat any condition, and this form is a record of a user trial, **not** a medical, regulatory or CDSCO approval.
